SUMMARY

M.S. in Finance graduate from Boston University with an MBA and software engineering background. Proficient in Python, SQL, C++, and data-driven problem solving, with a strong track record of building analytics tools and translating complex concepts into clear, actionable guidance for stakeholders. Combines engineering depth, financial training, and cross-functional collaboration, with the ability to thrive in fast-paced environments and work effectively across product, engineering, and business teams. Highly interested in customer-facing technology opportunities, and excited to apply analytical, problem-solving, and relationship-building skills in roles that connect technical and non-technical users.

EDUCATION

Master of Science in Finance <i>Boston University, Questrom School of Business; Boston, MA</i>	May 2026 GPA: 3.86
Master of Business Administration <i>University of Northern Colorado; Greeley, CO</i>	May 2024 GPA: 3.94
B.S. in Computer Science, with Honors <i>University of Colorado; Denver, CO</i>	May 2020 GPA: 3.67

WORK EXPERIENCE

Shift Supervisor 7Leaves Café	March 2024 - December 2024 Las Vegas, NV
- Delivered operational excellence and high customer satisfaction in a fast-paced, high-pressure environment. - Directed shift operations during ownership transition, resolving issues and maintaining service quality. - Trained and mentored a new team to build an inclusive and collaborative culture with positive morale.	
Associate II Software Engineer S&P Global (Promoted within six months for strong execution, ownership, and collaboration)	June 2020 - January 2023 Englewood, CO
- Built and optimized client-facing analytics web application delivering advanced visualizations across large energy and production datasets, improving how users interpret trends and make decisions. - Translated technical delivery and data constraints into stakeholder-ready insights, influencing roadmap prioritization and aligning cross-functional teams on outcomes. - Led adoption of a scalable front-end architecture and UI component library with 100+ components, accelerating delivery cycles and improving consistency across the Energy division. - Partnered with cross-functional stakeholders to define requirements, triage issues, and deliver enhancements on tight timelines in a high-expectation environment.	
Data Engineer Intern Health Data Compass	January 2019 - June 2020 Denver, CO
- Automated manual processes using Python, reducing processing time and freeing staff for higher-value analysis. - Presented analysis of enterprise APIs and resulting recommendations to support board-level strategic planning. - Researched and documented cloud data tooling (Google Cloud Platform) to support ETL reliability and improve team throughput.	

SKILLS & CERTIFICATIONS

- Certifications:** Microsoft Office Specialist (Excel, Word, PowerPoint)
- Programming & Data Analytics:** Python, SQL, Java, JavaScript, C++, HTML, CSS, Bash, TypeScript, Jupyter Notebook
- Cloud & Tools:** Amazon Web Services (AWS), Google Cloud Platform (GCP), Azure DevOps, Git
- Workflow:** Agile, Kanban
- Languages:** English – Native Proficiency, Cantonese – Conversational
