SUMMARY

M.S. in Finance graduate from Boston University with an MBA and software engineering background. Proficient in Python, SQL, debugging, and data-driven problem solving, with experience building analytics tools and translating technical concepts into clear guidance. Combines engineering depth, financial training, and cross-functional collaboration, with the ability to thrive in fast-paced environments partner across product, engineering, and business teams, and explain technical concepts clearly to non-technical audiences. Highly interested in customer-facing opportunities, and excited to apply analytical, problem-solving, and relationship-building skills in roles that help users adopt, understand, and maximize technical solutions.

EDUCATION

Master of Science in Finance , with High Honors	May 2026
<i>Boston University, Questrom School of Business</i>	GPA: 3.86

Master of Business Administration	May 2024
<i>University of Northern Colorado</i>	GPA: 3.94

B.S. in Computer Science , with Honors	May 2020
<i>University of Colorado, Denver</i>	GPA: 3.67

WORK EXPERIENCE

Shift Supervisor	March 2024 - December 2024
7Leaves Café	Las Vegas, NV

- Delivered operational excellence and high customer satisfaction in a fast-paced, high-pressure environment.
- Directed shift operations during ownership transition, resolving issues and maintaining service quality.
- Trained and mentored a new team to build an inclusive and collaborative culture with positive morale.

Associate I Software Engineer	June 2020 – December 2022
S&P Global	Englewood, CO

- Built and optimized client-facing analytics Angular web application delivering advanced visualizations across large energy and production datasets, improving how users interpret trends and make decisions.
- Translated technical delivery and data constraints into stakeholder-ready insights, influencing roadmap prioritization and aligning cross-functional teams on outcomes.
- Led adoption of a scalable front-end architecture and UI component library with 100+ components, accelerating delivery cycles and improving consistency across the Energy division.
- Partnered with cross-functional stakeholders to define requirements, triage issues, and deliver enhancements on tight timelines in a high-expectation environment.

Data Engineer Intern	January 2019 - June 2020
Health Data Compass	Denver, CO

- Automated manual processes using Python, reducing processing time and freeing staff for higher-value analysis.
- Presented analysis of enterprise APIs and resulting recommendations to support board-level strategic planning.
- Researched and documented cloud data tooling (Google Cloud Platform) to support ETL reliability and improve team throughput.

SKILLS & CERTIFICATIONS

- **Certifications:** Microsoft Office Specialist (Excel, Word, PowerPoint)
- **Programming & Data Analytics:** Python, SQL, Java, JavaScript, C++, HTML, CSS, Bash, TypeScript, Jupyter Notebook
- **Cloud & Tools:** Amazon Web Services (AWS), Google Cloud Platform (GCP), Azure DevOps, Git, Agile, UNIX, Windows, Linux, macOS, Shell, Bash, Terminal, JIRA, Claude Code, Agentic Coding
- **Languages:** English – Native Proficiency, Cantonese – Conversational
